

## NEWS RELEASE

### WesternZagros Provides Update on Sarqala-1

**Calgary, Alberta – September 8, 2008** – WesternZagros Resources Ltd. (TSX-V – WZR) ("WesternZagros") announced today that as drilling has proceeded at Sarqala-1, the well encountered an overpressured formation at a depth of approximately 2,300 metres which was significantly shallower than anticipated. Inconclusive oil and gas shows were also encountered. Following a 22 day delay in drilling, during which the Company managed the overpressure, casing was run. Following this, managed pressure drilling equipment was installed and drilling resumed on September 5, 2008. The well is currently drilling at approximately 2,500 metres.

Simon Hatfield, President of WesternZagros commented, "Despite the drilling challenges encountered in this well, we have seen nothing which changes our enthusiasm for the prospectivity of this block and the reservoirs we are targeting."

#### **About WesternZagros Resources Ltd.**

WesternZagros is an international natural resources company engaged in acquiring properties and exploring for, developing and producing crude oil and natural gas in Iraq. WesternZagros, through its wholly-owned subsidiaries, holds a Production Sharing Contract with the Kurdistan Regional Government in the Kurdistan Region of Iraq. *This news release may contain forward-looking information based on assumptions that are subject to a wide range of business risks. WesternZagros' operations are subject to all risks normally incident to the exploration, development and operation of crude oil and natural gas properties and the drilling of crude oil and natural gas wells, including geological risk, encountering unexpected formations or pressures, premature declines of reservoirs, potential environment damage, blow-outs, fires and spills, all of which could result in personal injuries, loss of life and damage to property of WesternZagros and others; environment risks; delay or changes in plans with respect to exploration or development projects or capital expenditures; the ability to attract key personnel; the risk of commodity price and foreign exchange rate fluctuations.*

*All of WesternZagros' assets are located in Kurdistan. As such, WesternZagros is subject to political, economic, and other uncertainties of that region as well as risks of loss due to civil strife, acts of war, guerrilla activities and insurrections. WesternZagros' operations may be materially adversely affected by changes in government policies and legislation or social instability and other factors which are not within its control. Risks also include the uncertainty involved in the estimation of undiscovered resources. For further information on WesternZagros and the risks associated with its business, please see the Western Oil Sands Inc. Information Circular dated September 14, 2007 which is filed at [www.sedar.com](http://www.sedar.com).*

*Forward-looking information typically contains statements with words such as “anticipate”, “estimate”, “expect”, “potential”, “could”, or similar words suggesting future outcomes. We caution readers and prospective investors of the Company’s securities not to place undue reliance on forward-looking information as by its nature, it is based on current expectations regarding future events that involve a number of assumptions, inherent risks and uncertainties, which could cause actual results to differ materially from those anticipated by WesternZagros.*
